Savant Labs Achieves ISO/IEC 17025 Accreditation

Savant places quality at the center of everything we do. As of January 2016, Savant Labs has earned ISO/IEC 17025:2005 accreditation for Chemical and Mechanical testing from Perry Johnson Laboratory Accreditation Inc. (PJLA) - an accreditation agency certified by the ilac-MRA. As a customer of Savant Labs, the ISO/IEC 17025:2005 accreditation offers several benefits:

- Reliable test and calibration results.
- Assurance that Savant Labs has a well-established quality management system.
- Greater credibility when sharing Savant Labs generated data with your customers.
- Clear, concise, and organized results reports.
- Assurance your samples are being tested by a world class quality laboratory recognized by International Standards Organizations.

In accordance with requirements of ISO/IEC 17025:2005, Savant Labs has improved our reporting to using an MS Word format. Customers will find the new report format aesthetically pleasing and professional, with an added benefit of simplified importation of data tables into Excel for further analysis – all in the effort of making it easy for Savant Labs to be your preferred testing lab.

Savant Labs is preparing more tests for ISO 17025 audit and looks to add additional tests throughout 2016. Look for this news to be shared in future On the Horizon releases.

Contact Savant Labs for your next testing project. Our accreditation certificate and test details can be found on our new [Savant Labs ISO/IEC 17025:2005 web page](#).
