

On the Horizon.....

Savant Labs Announce Launch of 'On the Horizon.....'

Volume 1, Q4 2013

We are delighted to introduce our first edition of the Savant Lab newsletter. *On the Horizon* is an update on important lubrication testing topics and news from the team at Savant Labs. We intend to make it a regular publication to introduce new services and share developments related to trends, advances and challenges in the oil and lubricants industries. We are eager to respond to the interests of our readers and look forward to your comments on this first edition using the [contact us](#) link.

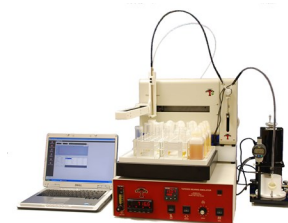

Dive deeper with Savant Labs! Our in-depth approach to testing and understanding of lubricant applications has led to the solution of critical industry problems. We perform over 200 tests aligned to ASTM methods. We can help you solve fluid / lubricant problems today and prepare for future requirements.

HTHS and Beyond.... Multiple Temperatures and Shear Rates

Need High Temperature, High Shear (HTHS) viscosity information at more than one temperature or shear rate? HTHS viscosity has been a vital automotive lubricant test since the early 1980's when the Tapered Bearing Simulator (TBS) Viscometer was first born in Savant Laboratory. It has long since been a critical test in the SAE J300 Engine Oil Viscosity Classification system and used in world-wide specifications. With the increasing quality of engine oils for today's engines and specifically the advent of lower viscosity engine oils, formulators and OEMs need to understand an oil's viscosity through a range of conditions. Savant Labs offers a unique configuration of the TBS Viscometer which allows temperature and shear rate adjustments from 40°C to over 150°C and shear rates from below 10^5 s⁻¹ to over 7×10^6 s⁻¹. Understand your oil formulation's viscosity behavior, [contact us for details](#).

The Tapered Bearing Simulator In Action!

Savant Labs Moves to Electronic Data Reporting

Savant Labs is moving to electronic results reporting to all its customers. The benefits to customers are clear: easier organization, improved data visibility, improved retention policy compliance, and easier data storage. There is also much less paper waste! The effort started as a customer suggestion and the Savant Labs team made it happen. [Learn More...](#)

Upcoming Events:

Gulf Coast Conference
October 15-16, 2013
Galveston, Texas

Norm Kanar

Savant Labs welcomes new team members:

Norm Kanar is Savant Labs' new Marketing and Sales Manager. Norm joins Savant Labs after 17 years at Dow Corning Corporation with the last nine years in marketing. Norm is proficient in business strategy analysis and is enthusiastic about serving customers with Savant's unique brand of personal attention and expertise.

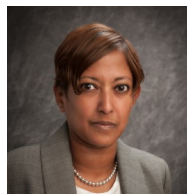

Virginia O'Neil

Virginia O'Neil is Savant Labs' new Operations Manager (formerly the Savant Lab Manager position). She joins Savant Labs after 24 years at Dow Corning Corporation with experience in technical service across several industrial application areas and the last year as Manager of Analytical Sciences. Virginia is passionate about aligning technical capabilities to customer needs.

Savant Labs People on the Move:

Samina Azad has moved from the Laboratory Manager position to the Technical Development Manager for Savant Labs. Samina will be managing contract research projects for customers, and also support internal test method development. Samina's strong technical skills make her an excellent fit for this role.

Samina Azad
